Version 4.0

Strategic Solutions Contract Operations Division

The General Services Administration (GSA), Federal Acquisition Service (FAS), Integrated Technology Service (ITS), Strategic Solutions Contract Operations Division offers a portfolio of pre-competed, Information Technology (IT) solutions Blanket Purchase Agreements (BPAs) awarded to firms. The BPAs in this division are for specialized IT products and solutions, including BPAs related to the Federal Cloud Computing Initiative.

We make it easy for you, our federal customers, by providing:

- Access to high-quality industry partners
- Pre-competed, multiple-award BPAs
- Shorter procurement lead-time
- Socioeconomic credit through FPDS-NG reporting
- Customer-focused staff with experience in technology acquisitions
- Scope compatibility reviews of prospective orders & modifications
- Acquisition support
- Consistent service categories for all vendors

# 1. Introduction

The Infrastructure as a Service (IaaS) Blanket Purchase Agreements (BPAs) were competitively awarded by GSA in accordance with FAR 8.405-3 to provide ordering activities with IaaS offerings at discounted prices and to facilitate the following:

## 1.1. Commodity Pricing

IaaS BPA holders were required to provide detailed pricing for explicitly defined, standard services, so customers can easily compare pricing for a single service across BPA holders. Additional discounts may also be obtained at the Task Order level.

## 1.2. Standardized Requirements

BPA holders are required to meet standardized technical and security requirements.

## 1.3. Comprehensive Services from a Single Task Order

Customers can obtain infrastructure services using a single fixed-price Task Order.

## 1.4. Proven Acquisition Excellence

IaaS BPAs will be administered using GSA's proven acquisition processes to ensure compliance and efficiency. IaaS BPA holder reporting requirements have already been established to make it easy for BPA users.

## 1.5. Primary Goods and Services

These BPAs offer ordering activities three key services through IaaS providers. The requirements have been divided into three distinct Lots:

- Lot 1: Cloud Storage Services - Scalable, redundant, dynamic Web-based storage that provides users with the ability to procure and use data and file storage capabilities remotely via the Internet.
- Lot 2: Virtual Machines – Virtualization services that provide on-demand virtual servers that dynamically allocate virtual machines based on load.
- Lot 3: Cloud Web Hosting – Web application hosting services in the cloud that enable scalable, redundant, dynamic web hosting services allowing users to procure and provision Web hosting services online using a web browser via the Internet.

IaaS providers were allowed to offer individual lots, a comprehensive offering inclusive of all lots, or any combination of the three Lots.

## 1.6. Synopsis

The GSA established multiple BPAs for IaaS offerings on behalf of the Federal Cloud Computing Initiative. Products include storage, centralized managed security, multiple operating systems, and bandwidth utilization services.

These BPAs will be managed by the GSA IaaS Program Management Office. The Point of Contact for all Cloud IT Solution inquiries is the National Customer Service Center, which can be reached via email at [NCSCcustomer.service@gsa.gov](mailto:NCSCcustomer.service@gsa.gov) or over the phone at 888-377-0070.

The IaaS BPAs were awarded competitively against GSA schedules. It is the responsibility of the ordering activity contracting officer to ensure compliance with all applicable fiscal laws prior to issuing an order under a BPA, and to ensure that the BPA holder selected provides the best value for the requirement being ordered.

### **1.7. Funds obligation**

This BPA does not obligate any funds. Funds will be obligated on task orders issued by ordering activities.

### **1.8. Ordering Eligibility**

This BPA may be used by any entity within the executive branch of government, and by state, local and tribal governments and other entities as listed in GSA Order ADM 4800.2G, [Eligibility to Use GSA Sources of Supply and Services](#) [PDF, 2.46MB], which provides detailed information regarding the agencies and organizations that are eligible to use GSA sources.

**Award Date:** 10/15/2010

**Expire Date:** 10/14/2015

**Period of Performance:** 5 years

### **1.9. Security**

Prior to accepting an order from an ordering activity, BPA awardees must complete the Assessment & Authorization (A&A) process at the Federal Information Security Management Act (FISMA) Moderate Impact Data Security Level as administered by GSA and indicated in section C.5.2 of the solicitation.

### **1.10. General Information Website**

### **1.12. List of Awarded Lots by Vendor**

Cloud storage, virtual machines, and web hosting services may be obtained from the vendors with awards for the relevant Lots as shown in Table 1. Awarded vendors have assembled skilled teams, including partners, that will support the development of quality services for ordering activities.

## 2. Seven Steps to Order from Infrastructure as a Service BPAs

This section provides seven simple steps necessary to place an order under the IaaS BPAs. A representative from GSA is always available to answer any questions that may arise.

### 2.1. Scope Determination

#### 2.1.1. Establish Ordering Activity Requirements

First, determine if the requirement is within scope of the IaaS BPAs. The following services are included:

- Lot 1 - Cloud Storage
- Lot 2 - Virtual Machines
- Lot 3 - Web Hosting

More details regarding the BPA's scope, terms and conditions, BPA holders and other BPA specific information can be found at <http://www.info.apps.gov/node/22>. If further assistance is needed to determine whether the requirements are within scope, please contact the National Customer Service Center, which can be reached via email at [NCSCcustomer.service@gsa.gov](mailto:NCSCcustomer.service@gsa.gov) or over the phone at 888-377-0070.

### 2.2. Prepare Statement of Work (SOW) or Statement of Objectives (SOO)

Here are some salient points to consider when drafting your requirements,:

- Scope of work to be performed
- Performance objectives
- Technical requirements
- Deliverables

#### 2.2.1. Location of Work

All IaaS BPA holders are required to have their IaaS servers and facilities located at a minimum of two different geographic locations in the Continental United States of America (CONUS), and all services acquired under the BPA are guaranteed to reside in CONUS.

#### 2.2.2. Period of Performance

The term of the IaaS BPA(s) will be for five (5) years. Quoters may be awarded BPAs that extend beyond the current term of their GSA Schedule contract as long as option periods exist in their GSA Schedule contract that, if exercised, will cover the BPA's period of performance [see FAR 8.405-3(c)]

## **2.3. Prepare the Request for Quote (RFQ)**

Follow established agency procedures for preparing an RFQ, including any internal policies and procedures related to acquiring IT products and services. Consider the following topics:

### **2.3.1. Task Order Value & Funding Type**

Estimate the value of the order. It is required to include language in the RFQ which indicates the intent to seek additional discounts for orders that are expected to exceed \$1,000,000.

If the intent is to use Recovery Act funding, in whole or in part, an informational posting of the RFQ in Fedbizopps (FBO) ([www.fedbizopps.gov](http://www.fedbizopps.gov)) is required [ref FAR 5.704 and 8.404(e)].

### **2.3.2. Service Level Agreement (SLA) (Performance Measurements)**

Service providers are required to meet the SLA requirements specified by GSA, including service availability of 99.5% (measured as Total Uptime Hours / Total Hours within the Month). Ordering activities that acquire services through a Task Order on the BPA can negotiate lower pricing, but the service provider cannot charge prices above the specified prices for a higher level of service.

### **2.3.3. Evaluation Criteria**

Consider including some combination of technical capability, price, and past performance when crafting best value evaluation factors. All orders will be fixed price.

## 2.5. Issue the RFQ

FAR 8.4 is applicable when issuing the RFQ.

Ordering activities must issue RFQs to all BPA holders offering the requested services. Further, and in accordance with Section C.5.2 of the solicitation, vendors must obtain a full authorization to operate before any ordering on the BPA is permitted. BPA holders may be solicited, quotes may be received, a winning vendor may be selected, and ordering activities can select a winner contingent upon a GSA-issued ATO. **Task orders cannot be issued until the ATO is complete.** See Table 1 for Lot Awards per Vendor for BPA holders and services offered.

- Ordering activities with purchase cards can place orders directly with BPA holders for orders at or below the micro-purchase threshold of \$3,000.
- Ordering activities shall forward the RFQ requirements and evaluation criteria to all BPA holders offering the requested services for orders above the micro-purchase threshold.

BPA users may issue an RFQ directly to the vendors listed in Table 1. Allow reasonable time for BPA holders to prepare quotes.

## 2.6. Evaluation

After the RFQ closes, evaluate all responses received using the evaluation criteria specified in the RFQ and select the BPA holder that represents the best value [see FAR 8.405-2(d) for additional guidance on this topic].

### 2.6.1. Price Reductions

Notwithstanding the BPA pricing discounts, ordering activities are encouraged and empowered to seek further price reductions when issuing orders under IaaS BPAs.

## 2.7. Award

Place the order as you would for any other fixed-price Multiple Award Schedule task order in accordance with FAR 8.406-1.

### 2.7.1. Documentation:

In accordance with the BPA and FAR 8.405-2(e), ordering activities shall document the following:

- Note the BPA holder receiving the Task Order & all BPA holders considered
- Description of what was purchased and agreed upon pricing
- The evaluation methodology used in selecting the BPA holder to receive the Task Order
- The rationale for any tradeoffs in making the selection
- The price reasonableness determination required by FAR 8.405-2(d)
- The rationale for using the BPA rather than a performance-based order

### 2.7.2. Other Helpful Hints:

- Make sure that the BPA number, the BPA holder's name, and Schedule Contract Number are included on all orders. Refer to FAR 8.406-1 for additional information to be included on orders.
- Award Notices for orders placed under this BPA, which are funded in whole or in part by the American Recovery and Reinvestment Act of 2009 (Pub. L. 11-5), shall follow the procedures in FAR 5.705.

## 2.8. Task Order Administration

The IaaS BPA requires that the ordering activity Task Order Contracting Officer use all standard Task Order administration practices such as:

- Surveillance and monitoring
- Performance Assessment
- Timely invoicing processes

The predefined reporting requirements for the IaaS BPAs are shown below:

**Table 2: Predefined reporting requirements**
